

CW200 Weld Cleaning System for MIG & TIG

The most reliable weld cleaners on the market, proudly made in the USA.

The CW200 model with an incredible 200 amps of cleaning power revolutionizes the capabilities of large cleaning and polishing work. All of the Capital Weld Cleaners machines quickly remove heat tint, oxidation, rust and passivate stainless steel in accordance with ASTM A967.

The CW200 features several operating modes that include **Cleaning/Passivation, Electropolishing** and electrochemical **Marking** and **Etching**.

Features.

- 200 amp Max output RMS - The Highest Output in the industry. Higher amperage produces a more aggressive cleaning reaction and faster cleaning speeds.
- Cleans Mig & Tig welds on stainless steel and aluminum.
- Compatible with APG accessory
- Allows use of up to 4 High-Amp brushes for a larger cleaning area and faster cleaning speeds.
- Compatible with Marking and Etching kits.
- LCD screen with digital output readouts.
- Easily switch between cleaning and polishing modes.
- Amperage outputs easily changed in 10 amp increments.
- 115VAC input.

Included.

- 1 dipping container.
- 20ft Wand and cable.
- 20ft Ground Cable.
- 2 carbon fiber high amperage brushes
- Stainless Steel dual-brush adapter
- 1QT weld cleaning solutions.
- 16oz weld cleaner neutralizer.
- 1 container of 40ct neutralizing wipes.
